WIRING MATERIALS

Over 80 of electro-installation and stowage material production

The beginning of electrotechnic production of KOPOS KOLÍN goes back to the year 1926. Even before the WWII the company reached monopolistic status among keen competition on domestic market. After war the assortment changed slightly to match political needs.

Starting from 1994, new management of the company started with intense investments and development program. To ensure enough of quality raw material, the company has built its own PVC mixture production facility. The peak of the modernization process with regards to the quick growth of the company and its high logistics demands occurred in the year of 2005 and in 2008 there were opened two new storage and administrative production halls.

Within the innovation processes the company progressively introduces a new way of producing the technical documentation and a lot of modern technologies. A lot of new products were introduced, e.g. series of electroinstallation laths, double-coated corrugated pipes, double-coated parapet culverts, lead-free products or wide range of halogen-free products. There are 5000 kinds of products up today in the assortment of KOPOS KOLÍN.

The company's number one production priority is the quality of products. New products are always adjusted to match the EU standard requirements and all the assortment is traditionally tested according requirements of harmonized electrotechnic standards.

KOPOS KOLÍN a.s. is a holder of the certificate ISO 9001 and ISO 14001 as well as the Safe company and the Czech quality certificates. The company provides 100% guarantee on keeping the process stability, and consequently on the quality and safety of the products.

The company is always ready to match increased needs of the market and this helps to keep its permanent leading position. It can be considered a significant success that in the recent years KOPOS KOLÍN a.s. opened up 13 daughter sales companies mainly in Easter Europe, but also in Asia and in Africa, and it evolved from a domestic supplier to a company with a share in the world's market.

**The most important man in KOPOS KOLÍN is always the customer.
THANK YOU FOR YOUR PARTNERSHIP**
