product description: Steel anchor with internal thread and spacer pin.

The drop-in anchors serve for the direct attachment of the threaded rods to the base material.

Inside the anchor there is a spacer pin. Pin must be hammered down before mounting threaded rod.

They are suitable for installation in concrete C20/25 or natural stone with solid structure.

The anchors KKZ 8, KKZ 10 and KKZ 12 are with collar.

Mounting procedure: Drill a hole in the subfloor diameter and a minimum such a depth as shown in the table for the anchor

Clean drilled hole from residues by brush

Insert the anchor into the hole

Using the impact tool hammer the pin that is at anchor

Screw the bolt / threaded rod to anchor

surface finish: ZNCR - bichromatic galvanised

sales amount: á 1 pc

storage: EN 60721-3-1
